HD32X2C23

This Worldview Time Zone Clock features two 17.75" high HD monitors in a single Aluminum frame. Many end user modifiable time zone templates are included. This model has the ability to play videos at scheduled times, display custom logos, scrolling or static text messages, time and date in a variety of formats, Julian date and a full featured active world map that has a day/night overlay and more. The included infrared remote supports time zone page flipping, instantly changing between configured text messages or controlling a countdown timer. Google Earth is available when connected to a network which allows zooming in on hot zones and mission critical areas.

The clock's time is factory calibrated with the U.S. Atomic Clock and will remain accurate for the life of the display, eliminating the need for network connections or manual time updates. The OCXO real time oscillator is accurate up to 1 second in 20 years. This time zone clock is housed in an attractive, sturdy black brushed aluminum frame that mounts flat against the wall, providing a professional fit and finish for any board room, command center or lobby. Choose between the Wi-Fi option or non-wireless SCIF option at the time of ordering. All models include a wired network connection.
