

## 5610 Style Time Zone Clock

Model 5610DR - 1.2" time, 1.2" zone labels, 4 zone

Model 5610DG - 1.2 time, 1.2" zone labels, 4 zone

The 5610 series time zone clocks have 5 character dot matrix LED time displays with a ten character dot matrix digital zone label below. In many 5610 models, the clock can display up to 17 time zones through page flipping. For Example, a six zone clock can show two pages of time zone information. Likewise, a four zone unit can show four pages.

Each 5610 clock comes standard with an OCXO oscillator, which is accurate to .06 seconds per year.

For easy clock management, an infrared (IR) remote control is included with every 5610 model. You can specify a radio (RF) remote, if preferred for no additional charge. Every 5610 model includes your choice of an Ethernet or USB interface for easy time zone parameter control.

### Features:

- OCXO oscillator accurate to .06 seconds per year
- 1.2" or 2.0" red, blue or green bar segment LEDs for displaying time\*
- 1.2" or 2.0" red, blue or green 10 character alpha numeric dot matrix LEDs for displaying zone names\*
- Models that display from 1 to 8 separate time zones
- Zone flipping feature that allows up to 17 zones in a single clock\*
- 12 or 24 hour format
- DST and time zone offsets supported
- PC Interface: USB Interface
- IR remote control standard or optional RF remote
- Black brushed Aluminum frame
- Multiple cord lengths available
- US, British, Australian or European plugs
- 100-240 VAC. 50-60 cycle power
- Available on GSA, contract GS-02F-0030U

\*See individual model number for details.

### Oven Controlled Crystal Oscillator (OCXO)

- Accurate to 2 PPB (parts per Billion) or .06 seconds per year or about 1 second in 20 years.
- 1 thousand times more accurate than most competing clocks
- Eliminates the need for GPS or Network time synchronization for
