

## 2.4 GHz Wireless Analog Clocks Accessories

## **Clock Lock**

Keep your DuraTime clocks from being an easy target for thieves with the DuraTime analog clock lock bracket. These brackets are designed to mount to a single electrical gang box in the wall, or can be directly mounted to the wall. Two Philips screws lock the clock to the bracket, deterring thieves from stealing the clock. These brackets are available for all DuraTime Analog clocks.

## **Double Sided Bracket**

Available in either silver or black, these heavy duty steel brackets can easily be mounted on a wall or from the ceiling. There are four screws that lock each clock to the bracket, making them virtually impossible to steal. The Brackets come in two different sizes to fit all of our analog clocks.
