

BRGQ28P1 Take-A-Number System

The BRGQ28 is a Take-a-Number System like no other. The system includes a take-a-number ticket dispenser, multi-color LED display with 8 inch digits for the count, or count plus customer window, alert tone only or alert tone with voice audio, and a U.S. government approved wireless window remote control with 10 year battery. The LED wall display has user-changeable-color with adjustable intensity. Features include a user selectable tone alert and/or voice audio. The display color changes as the numbers are announced. The last count is maintained during power outage. The last four activations are repeatedly displayed. Any number of digital wall displays may be used and up to 64 window remote controls are supported. The basic system includes: ticket dispenser with tickets, floor stand, industrial wireless remote, multi-color LED display and AC power adapter. Made in the USA with a full one year warranty.

Operation:

Pressing the window remote's Next button increments the ticket count, and sounds an alert tone and/or voice announcement. Pressing the Back button decrements the count without an alert sound. Pressing the Repeat button repeats the announcement for the remote control pressed. The take a number display may be reconfigured at any time to one of two standard configurations.

Features:

- 2 in 1 operation – two user configurable operating modes
- Bar segment LED displays are easier to read than older dot-type displays
- Plug-and-Play, no complicated network, configuration or complicated wiring
- Simple installation with no technical skills required.
- Simple ticket dispenser, no expensive printer to malfunction, no paper jams
- User changeable LED display color scheme
- Anti-glare lens allows viewing under most lighting conditions
- Four selectable channels to avoid interference between two systems
- User selectable speech announcement and/or audio tone/chime
- Select Language for Voice Announcement (English only, Spanish only or English/Spanish Combination)
- The display changes color with each announcement.
- History showing the last four announcements is displayed
- Sturdy industrial, U.S. Government approved, wireless remote control
- Wireless remote operation to increment, decrement or repeat the count
- Wireless remote operates up to 10 years between battery changes
- No wiring between window button and wall displays
- Wall displays include control buttons to increment or decrement the count
- Simple configuration and easy to use
- The count and window number is maintained during power outages
- Repeat audio with the correct window number from the last 25 transactions
- Alert chime can be configured to sound before the voice announcement
- Adjustable display intensity
- Simultaneous button presses are buffered and managed
- Separate adjustable alert chime/tone and voice audio volume up to 102 dB.
- A line-level audio jack is available for connecting the display to the building's PA system
- Any number of LED wall displays may be used
- Wall displays - 2 digit with 8" high digits, black Aluminum enclosure
- Displays can be reconfigured using the buttons on the display or the remote control
- Additional displays mirror the primary display, including audio
- Displays are configurable to operate as Single, Primary or Secondary Single mode.
- 30 day money back guarantee
- Free toll-free technical support.
