

Now Serving  
Number 7 at  
Window 6

The BRGQ44 multi-color LED display with 4 inch digits for the count, or count plus customer window, alert tone only or alert tone with voice audio. The LED wall display has user-changeable-color with adjustable intensity. Features include a user selectable tone alert and/or voice audio. The display color changes as the numbers are announced. The last count is maintained during power outage. The last four activations are repeatedly displayed. Any number of digital wall displays may be used and up to 64 window remote controls are supported. Made in the USA with a full one year warranty.

## Features:

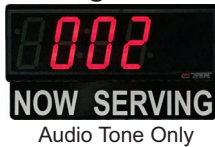

- 8 in 1 operation – eight user configurable operating modes
- Bar segment LED displays are easier to read than older dot-type displays
- Plug-and-Play, no complicated network, configuration or complicated wiring
- Simple installation with no technical skills required.
- User changeable LED display color scheme
- Anti-glare lens allows viewing under most lighting conditions
- Four selectable channels to avoid interference between two systems
- User selectable speech announcement and/or audio tone/chime
- Select Language for Voice Announcement (English only, Spanish only or English/Spanish Combination)
- The display changes color with each announcement.
- History showing the last four announcements is displayed
