

# BRG Multimedia Time Zone Series

www.brgprecision.com

Model Shown above is a MTZB Programmable Multimedia Time Zone Clock

BRG Multimedia Time Zone Clocks feature a 32" or 43" LED/LCD 4K Monitor centered between either 4, 6 or 8 time zones. Choose between fixed or programmable models. Fixed models are set to the 4, 6 or 8 time zones and feature white vinyl zone labels. Programmable models offer 4, 6 or 8 time zone locations with dot matrix zone labels. The programmable models can be programmed to flip zones to show up to 24 different time zones in one clock. Featuring a OCXO Oscillator, these clock are accurate to 1 second over 20 years.

The centered 4K video display is detailed and highly informative. The default configuration displays a real-time world map with a variety of attributes and message tickers. Map features include sun shading, city lighting at night, sunrise/sunset times, local time clock, clocks for each time zone, pan and zoom anywhere on the map, points of interest labels, sun and moon locations, satellite orbits, and more. Up to four scrolling message tickers are supported. These message tickers can display organizational information from local or network text files, along with public news feeds.

Editing the schedule is easy with the included wireless keyboard remote which include touch pad or with your own USB keyboard with touch pad.

The Multimedia Display is available without Wi-Fi and Bluetooth for secure locations.

## BRG Time Zone Clock

Accurate to 1 second in 20 years, no manual or external time correction needed. IR remote control. Optional touch-screen IR remote control & more.

- All zones are precisely synchronized with one another.
- Supports Page Flipping to display more zones than physical zone positions available.
- Dynamic digital lettering can include fixed titles and/or date, day, day of the year etc.
- Factory synchronized with the U.S. Atomic Clock.
- Accurate for Life – no manual adjustments are required for the life of the display, no sync wires, no radios, no problems.
- Time and configuration are maintained during shipping and power outages
- Operating Voltage: 90-265 volts AC.
- Many control, sync methods, power and color options are available - Ethernet is standard
- Infrared remote control included (RF remote optional)

For Wi-Fi enabled units, this wireless keyboard with touch pad to make programming changes to the multimedia display.

For secured locations that don't allow Wi-Fi, this USB keyboard easily plugs into the side of the clock frame allowing you to make programming changes to the multimedia display.

# BRG Multimedia Time Zone Clocks

- Map supports pan & zoom
- Google Earth pan & Zoom
